

# GLOSSARY v1.1

**Faculty** is a researcher or teaching member of a department in a university.

**Student** is a graduate student who does research in his field of interest within his department in a university.

**User** is a person who is either of type faculty or student, used in the project specification to explain the fact that's its applicable to both members. User don't belong to any project and are unauthorized to access any projects.

**User Request** is a reject made to either join a project or leave an existing project as a team member.

**Founding Member for a particular project** is the user who owns that project. A founding member is the only user that can delete projects created by him. Also, founding member is the only person who can create iterations for a particular project.

**Team Member for a particular project** is a user who belongs to that project. Team members can create, edit, delete tasks for a particular iteration of a project.

**Profile details of a user** includes details of his/her profile such as name, age, department, contact information, research interest and category, resume and his/her projects.

**Project details of a project** include short title, funding allocated, difficulty level, description, research category, timeline and it's team members.

**Iteration** is a milestone or part of a particular project. Each team member cannot begin working on the next iteration unless everyone in the previous iteration have completed their tasks.

**Task under iteration** includes short title, description, assignee, status, start and end date.
